

Phone-free, without going offline

Signal-blocking bags remain the core of our line, and an effective way to help students focus. Now every Generation Faraday bag is also available **without the signal-blocking Faraday liner**: same construction, same closures, same asset tracking. Phones stay stowed and sealed in the bag while remaining connected.

WHY SCHOOLS CHOOSE BAGS WITHOUT SIGNAL BLOCKING

- Phones remain connected for emergency alerts, calls, and messages
- Parents and guardians can continue using location-sharing services
- Supports certain medical devices and accessibility needs
- Addresses concerns about fully disconnecting student phones
- Background syncing and connected functions keep working
- A more affordable alternative to Faraday-lined bags
- Still supports phone-free policy through locking or standard-seal closures

THE FULL LINE, WITHOUT SIGNAL BLOCKING

Every bag is available **without the Faraday liner**, so signals are not blocked.

				
NON-SIGNAL-BLOCKING	NON-SIGNAL-BLOCKING	NON-SIGNAL-BLOCKING	NON-SIGNAL-BLOCKING	NON-SIGNAL-BLOCKING
Pro Velcro	Pro Magnetic	Max Velcro	Max Magnetic	Max Lock
GFSB-PRO -NOFARADAY	GFSB-PRO-M -NOFARADAY	GFSB-MAX -NOFARADAY	GFSB-MAX-M -NOFARADAY	GFSB-MAX-LOCK -NOFARADAY
Ballistic nylon	Ballistic nylon	Waterproof TPU	Waterproof TPU	Waterproof TPU + locking closure

All closure and customization options carry over, at full rollout volume or in small quantities. Schools can combine both lines in one order, and either bag works with the same storage solutions and the Generation Faraday app.
